Professional Summary

E-commerce Frontend Developer with 2+ years of experience engineering high-performance, customer-facing web and mobile shopping experiences. Specialized in developing core e-commerce architectures—including **Product Listing Pages (PLP), Product Detail Pages (PDP), Cart, and Checkout workflows**. Proficient in **React.js, Next.js, Shopify, Node.js, and JavaScript**, with a proven track record in REST API integration, AEM customization, and performance optimization. Extends technical expertise to mobile application development using **React Native** with integrated location services and payment gateways.

Professional Experience

Frontend Developer (E-commerce), TechDenali	02/2024 – Present Hyderabad
• Architected scalable frontend solutions for high-traffic e-commerce and enterprise web applications, ensuring cross-browser compatibility and a seamless, intuitive user experience. • Engineered core storefront modules—including <i>PLP, PDP, Faceted Search & Filter Navigation, Wishlist, Ratings & Reviews, Cart, and Checkout</i>—to optimize user journeys and drive conversion funnels. • Developed an intuitive Admin Dashboard and Vendor Portal, empowering product owners with robust tools to seamlessly upload inventory, manage catalogs, and track real-time marketplace metrics. • Designed secure User Profile and Order History systems, providing customers with self-service order tracking, past invoice access, and account management tools. • Integrated complex REST APIs and third-party services (including Adobe Experience Manager and secure payment gateways), enabling seamless dynamic data synchronization and secure transaction flows. • Boosted application performance by implementing advanced frontend optimizations, utilizing lazy loading, code-splitting, caching strategies, and pagination to minimize page load times and improve rendering efficiency. • Translated complex business requirements into production-ready frontend features, collaborating with cross-functional teams of designers, product managers, and backend engineers to deliver stable, maintainable codebases. • Extended technical expertise to mobile environments, developing cross-platform features using React Native, including Google Maps API for location tracking and payment gateway integrations.	

Education

Bachelor of Technology (B.Tech) – Information Technology, NRI Institute of Technology

Technical Skills

Frontend Technologies

React.js, Next.js, JavaScript (ES6+), HTML5, CSS3

Backend Technologies

Node.js, REST APIs

Tools & Version Control

Git, Bitbucket, Jira

Mobile Technologies

React Native

E-commerce / CMS

Shopify, AEM (model.json, component creation)

Core Expertise

- E-commerce Frontend Architecture
- PLP & PDP Optimization
- Payment Gateway Integration
- Web Performance Optimization
- Responsive Storefront Customization
- Cart & Secure Checkout Workflows
- RESTful API & Third-Party Services
- Cross-Platform Mobile Development

Project Experience

Arrow Electronics , Technologies: React.js, AEM

- **Engineered scalable, reusable React frontend components** across enterprise-grade web applications and high-traffic e-commerce architectures.
- **Mapped and integrated headless AEM model.json data streams** into the React framework to enable dynamic, real-time content rendering.
- **Architected comprehensive e-commerce shopping systems**, spanning discovery features (*PLP, PDP, Faceted Search & Filters*) through transactional and account workflows (*BOM processing, Cart, Checkout, Address Book, Account Profiles, and Order Tracking*).
- **Integrated complex APIs** and managed application state to significantly elevate code maintainability and user experience fidelity.
- **Executed targeted web performance optimization strategies**, utilizing code-splitting, lazy loading, pagination, and caching to reduce rendering latency.

Exemplis (Client: Albany Park) , Technologies: Shopify, Liquid, JavaScript (ES6+), HTML5, CSS3/SCSS

- **Customized and optimized high-performance Shopify Liquid themes** for Albany Park, elevating the digital brand presentation and storefront UI/UX.
- **Engineered critical customer conversion features**, including global promotion banners, countdown timer mechanisms for flash sales, and interactive product collection filter networks.
- **Architected complex side-cart drawers and mini-cart workflows**, implementing dynamic pricing mechanics, custom cart calculations, and shipping threshold progress metrics to maximize average order value (AOV).

ParkSmart, Technologies: React Native, Google Maps API, Payment Integration

- Developed a React Native mobile application with location-based and transaction-related functionality.
- Integrated Google Maps API for navigation, location display, and nearby parking-related workflows.
- Implemented payment integration to support mobile user transaction flows.
- Built mobile UI components and handled API-based feature rendering.
- Worked on third-party integrations and frontend feature delivery in mobile application development.
